Title:	INTEGRATED POLICY FOR QUALITY, ENVIRONMENT, ENERGY, HEALT AND SAFETY	Pag. 1 di 3

Elettrodotti Cantamessa & Co. S.p.A. pursues the effectiveness of services and the economic efficiency of management by adopting socially responsible behaviour, monitoring and responding to the economic, environmental and social expectations of all stakeholders. To achieve this goal, has adopted an Integrated Management System that complies with the UNI EN ISO 9001, UNI EN ISO 14001, OHSAS 18001 and UNI EN 50001 standards.

From the identification and analysis of business processes, through the continuous monitoring of the respective quality, environment and safety indicators, the planning of resources and the coordinated and controlled management of the processes, the objectives of the Integrated Management System arise.

Cantamessa & Co. S.p.A. undertakes, therefore:

- to guarantee the same standards of absolute quality throughout the territory served (in Italy and abroad);
- strict compliance with national laws, Community directives and any other applicable regulations, with particular attention to environmental, energy and health & safety in the workplace legislation, to specific regulations, including voluntary, on the management and treatment of waste in particular and on use, consumption and energy efficiency.
- Identify appropriate measures to reduce energy consumption and increase using of alternative and renewable energy sources
- Promote and support the purchase of energy-efficient products and services and promote, also towards the customer, a design that considers the improvement of energy efficiency;
- Encourage staff to put into practice any initiative taken to reduce energy consumption both in workplace and in their private life.
- to provide the resources necessary for the continuous improvement of production processes and their performances and for training of all employees;
- the prevention of any possible process anomaly through communication, training, awareness and constant consultation of staff;
- the pursuit of customer satisfaction and the expectations of all the parties involved, through the activation and maintenance of all possible communication channels;
- to ensure the correct application of technologies used, aiming wherever possible for their improvement or adoption of more advanced technologies, especially in terms of energy efficiency, respect for the environment and safety;
- to adopt tools to analyse accidents and non-accidents, in order to identify their root causes and prevent their recurrence;
- the prevention of pollution through a careful management and maintenance of vehicles and equipment with greater environmental impact;
- to protect health and safety in the workplace, through a tendential reduction of accidents' number through the rigorous application of all specific rules and preventive staff involvement;

	<u>UNI EN ISO 9001</u> <u>UNI EN ISO 14001</u> <u>BS OHSAS 18001</u> <u>UNI CEI EN ISO 50001</u>	Rev. 2
Title:	<u>INTEGRATED POLICY FOR QUALITY, ENVIRONMENT, ENERGY, HEALT AND SAFETY</u>	Pag. 2 di 3

- the continuous improvement of its environmental performance, quality and health and safety at work through the maintenance of the Integrated Management System, the progressive adoption of increasingly higher targets and the periodic review of the efficiency of the System and its compliance with this Policy;
- control and reduction, where possible, of the own waste production and use of products and materials with the lowest possible risk for the environment and safety;
- to involve all collaborators, each according to their role and competence, in implementing what is necessary for the prevention of health and safety risks;
- to evaluate investments and plants, machinery and equipment change considering, in addition to the economic and financial aspects, also quality aspects, environment and safety of workers features;
- to spread the correct practices of attention to environment, safety and quality even among its suppliers, choosing them also on the basis of these characteristics;
- the choice of suppliers, contractors and managers of outsourced activities, preferring, in a free competition context, those who demonstrate to have adopted practices and initiatives in favour of the environment and safety, in addition to the timely compliance with all obligations in the field of environment and safety.
- management and a systemic approach to the continuous improvement of the company's energy performance both at headquarters and on construction site

Due the particular activity performed, Elettrodotti Cantamessa & Co. S.p.A. it is naturally aimed at the management of construction sites basing its activities on the correct use of resources and on the full respect of the ecological standards regarding atmospheric emissions, hazardous substances and waste, trying to guarantee the best differentiation, the correct management of substances and materials present on the sites, savings and mostly creation of environmental widespread awareness.

Training is considered a fundamental tool for workplace health&safety directives disclosure, to which all workers must work to operate in an environment that has lower risk for people and things.

Training is also a primary means for culture and environmental awareness disclosure, for protection of territory environmental heritage and safety level and health of its inhabitants. For this reason, in addition to the training that the company provides to its staff,

Elettrodotti Cantamessa & Co. S.p.A. it is also aimed externally because of the knowledge of the sector that derives from its daily work; in compliance with the principles of user orientation, for a service focused on the user, involving staff, to ensure the best skills and professionalism, approach to processes, for the synergistic addressing of all available energies.

The Management is also committed to fostering open dialogue with the citizens and with all the local realities involved, promoting active involvement for a better management of construction site and in total activity of Elettrodotti Cantamessa & Co. S.p.A.

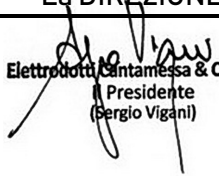

Aware of the importance of information and transparency, Elettrodotti Cantamessa & Co. S.p.A.
